Description

RealPage, Inc. is looking for a skilled **React Developer** to join our remote engineering team. The ideal candidate has strong front-end development experience and a passion for building fast, responsive, and user-friendly web applications.

You will collaborate with designers, backend engineers, and product teams to deliver high-quality digital experiences that support scalable business solutions.

Responsibilities

- Develop modern web applications using **React.js**.
- Build reusable components and scalable front-end libraries.
- Convert UI/UX designs into responsive, production-ready code.
- Optimize applications for speed, performance, and scalability.
- Integrate REST APIs and collaborate with backend teams.
- Debug issues and continuously improve application performance.
- Participate in code reviews and follow engineering best practices.

Qualifications

- Bachelor’s degree in Computer Science or equivalent experience.
- **2–5+ years** of professional frontend development experience.
- Strong expertise in **React.js**, JavaScript (ES6+), HTML5, and CSS3.
- Experience with state management tools (**Redux, Context API**).
- Familiarity with REST APIs and JSON integrations.
- Experience with Git and version control workflows.
- Understanding of responsive design and cross-browser compatibility.
- Experience with **Next.js** or modern React frameworks.
- Knowledge of **TypeScript**.
- Familiarity with CI/CD pipelines.
- Experience working in Agile/Scrum environments.
- Understanding of frontend performance optimization techniques.
-
