Description

Runergy Solar is looking for a talented **Web Applications Developer** to design, develop, and maintain modern web-based applications. The ideal candidate has strong full-stack development skills and experience building scalable, secure, and high-performance web solutions.

You will collaborate with product, design, and engineering teams to create applications that deliver excellent user experiences and support business operations.

Responsibilities

- Develop and maintain **web applications** using modern frameworks and technologies.
- Design responsive and user-friendly interfaces.
- Build and integrate **RESTful APIs** and backend services.
- Write clean, efficient, and scalable code following best practices.
- Optimize applications for speed, performance, and security.
- Troubleshoot issues and implement long-term technical solutions.
- Participate in code reviews and Agile development processes.

Qualifications

- Bachelor’s degree in Computer Science or equivalent practical experience.
- **2–6+ years** of web application development experience.
- Strong knowledge of:
    - **JavaScript, HTML5, CSS3**
    - Frontend frameworks (**React, Angular, or Vue**)
    - Backend technologies (**Node.js, Python, Java, or .NET**)
- Experience working with **REST APIs** and databases (SQL/NoSQL).
- Familiarity with **Git** and version control workflows.
- Understanding of web performance optimization and responsive design.
- Experience with **cloud platforms** (AWS, Azure, or GCP).
- Knowledge of **Docker** or containerization.
- Familiarity with CI/CD pipelines.
- Understanding of web security best practices.
- Experience in Agile/Scrum environments.
-
